

Leonardo Vitale - Front End Engineer

São Paulo, Brazil | leonardo.vitale@outlook.com | +5511996762153

Profile

Principal Front-End Engineer with 20+ years of experience designing and scaling enterprise-grade React platforms.

Specialized in Clean Architecture and front-end system design, I lead architectural transformations that reduce technical debt, improve delivery predictability, and enable teams to scale sustainably.

Proven track record of driving cross-squad standards, mentoring senior engineers, and remaining hands-on in critical code paths for mission-critical products.

Accomplishments

- Led company-wide adoption of Clean Architecture across multiple FE squads, **reducing onboarding time by ~30% and improving maintainability and debugging efficiency across the platform.**
- Architected and delivered major refactors (Email Composer, Ticket Relationships), **simplifying complex enterprise workflows used by thousands of daily users.**
- Defined and rolled out FE engineering standards (controller hooks, DTO boundaries, folder structure, testing strategy), **aligning delivery across squads and reducing architectural drift.**
- Improved release stability by strengthening FE quality gates, **significantly reducing critical production issues.**
- Acted as a bridge between Frontend, Product, UX, and Backend, **improving discovery quality, scope clarity, and delivery predictability.**

Professional Experience

Front-End Tech Lead , Xelix (London, UK), London - United Kingdom

Nov 2021 to Present

- Lead a team of 6 Front-End Engineers across multiple squads, owning FE architecture, delivery quality, and technical strategy.
- Drove the modernization of the entire FE platform using Clean Architecture and SOLID principles.
- Remained hands-on as a Senior Engineer, owning critical paths in React, TypeScript, TanStack Query, Redux Toolkit, Zustand, and monorepo architectures.
- Designed scalable state management, caching, and performance strategies for enterprise Helpdesk and Ticketing workflows.
- Mentored engineers on architecture, problem-solving, communication, and leadership, raising overall technical maturity of the FE organization.

Front-End Engineer Senior, Tacx.com / Garmin, Leiden - Netherlands

Oct 2020 to Nov 2021

- Enhanced the indoor cycling performance platform using Angular, REST APIs and custom UI solutions.
- Delivered improvements for real-time race simulation, ensuring fluid visualizations and accurate performance metrics.

Front-End Engineer Senior, CarNext.com, Amsterdam - Netherlands

Sept 2019 to Oct 2020

- Built next-generation digital automotive products using React, TypeScript and Styled Components.
- Collaborated with international teams to deliver scalable and maintainable user interfaces.

Front-End Tech Lead, Publicis.Sapient, London - United Kingdom

Oct 2018 to Aug 2019

- Led FE modernization for Nationwide Building Society, improving performance and implementing React + Redux best practices.
- Increased team efficiency through better architecture, tooling, and scalability patterns.

Front-End Lead & UX Specialist, Agile Content, Sao Paulo - Brazil

Jun 2013 to Oct 2018

- Joined Agile Content to work on **four major Video on Demand (VOD) products** for the launch of the **Xbox One** in Brazil, collaborating with major broadcasters such as **Globo**.
- Recognized for strong product thinking and selected to create the POC for **Sky Online**, a Netflix-style platform. Designed all screens and built the prototype in **3 days**, helping the company **win the competitive bid**.
- Began working with **React in 2015**, becoming a **Front-End Tech Lead for 4 years**, teaching React to the entire team and modernizing the company's FE approach.
- Led UX + FE for **Net Now**, winning another major industry competition. Actively participated in **brainstorming, research, discovery, prototyping** and solution design.
- Successfully delivered the Net Now platform in **6-7 months** with the newly trained React team, establishing React as a key technology in the company.

Education

Web Development, São Paulo

UNIP, Jan 2007 to Feb 2009

Focus on full-stack development, UX fundamentals, and software engineering foundations.
